

Inpatient Glucose Management Services

MarinHealth Medical CenterSM provides a variety of personnel and services to effectively manage your blood sugar while you are in the hospital. We work collaboratively with your providers to ensure a seamless transition from outpatient care to inpatient hospitalization and through discharge to home.

What You Can Expect for Blood Sugar Control

- Review of your chart by the Glucose Management Team (GMT) per provider request
- Diabetes education for your nurse and hospitalist
- Consultation with you, your support system(s) and your provider (as needed)
- Collaboration with care coordinator, dietitian, pharmacy, outpatient provider, and others (as needed)
- Referral to outpatient provider(s) based upon individualized needs

What You Can Do

- Talk with your nurse and hospitalist regarding how you manage your blood sugar at home and your admission hemoglobin A1c
- Keep informed regarding your bedside blood sugars and treatments while in the hospital
- Consult with our dietary partners regarding your meal plan while in the hospital
- Prepare yourself for discharge by anticipating your needs at home (do you have the supplies you need for testing your blood sugar and taking your medications?)
- Let the GMT know if you need support
- Follow up with your primary doctor or endocrinologist after discharge
